

The Uses of Ripple Effects Mapping

Sean Culhane, Region 5 Prevention Coordinator

Nick Stilp, The Improve Group

Courtney Clingan, The Improve Group

Presentation Overview

- **What is Ripple Effects Mapping?**
- **How do you facilitate a successful Ripple Effect Mapping activity?**
- **Practical uses and examples of Ripple Effect Mapping**

What is Ripple Effect Mapping? (REM)

An evaluation technique that uses a participatory approach to understanding connections between intended and unintended effects of an initiative.

- “Effects” refer to any type of changes, outcomes, impacts, or other results due to influence from the initiative.
- Workshop results in a map illustrating the ripple effects of the initiative

Why use Ripple Effect Mapping?

Ripple Effect Mapping is useful for:

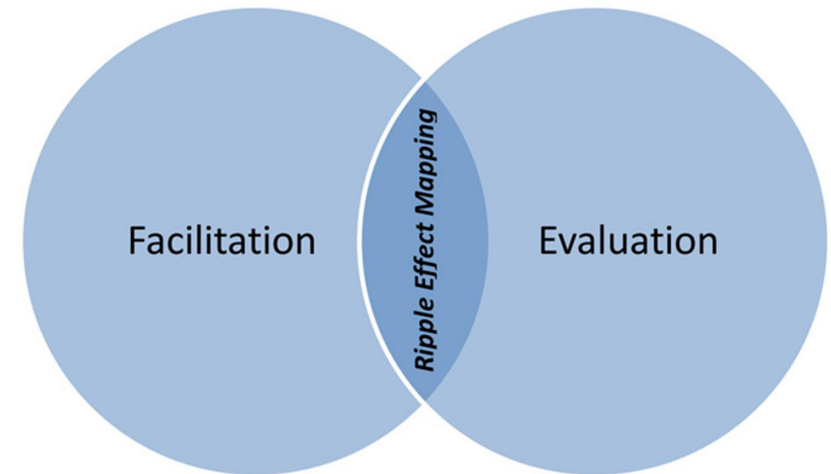

- Exploring effects of complex or shifting initiatives
- Identifying initiative effects that are difficult to conceptualize
- Evaluating initiatives midway through, or at the end of programming

Benefits

Benefits of Ripple Effect Mapping include:

- Engages stakeholders in the evaluation process
- Is positive, fun, and engaging
- Provides an opportunity for group reflection
- Surfaces unexpected and indirect initiative effects
- Collects stories from a variety of stakeholder perspectives

Limitations

Limitations of Ripple Effect Mapping include:

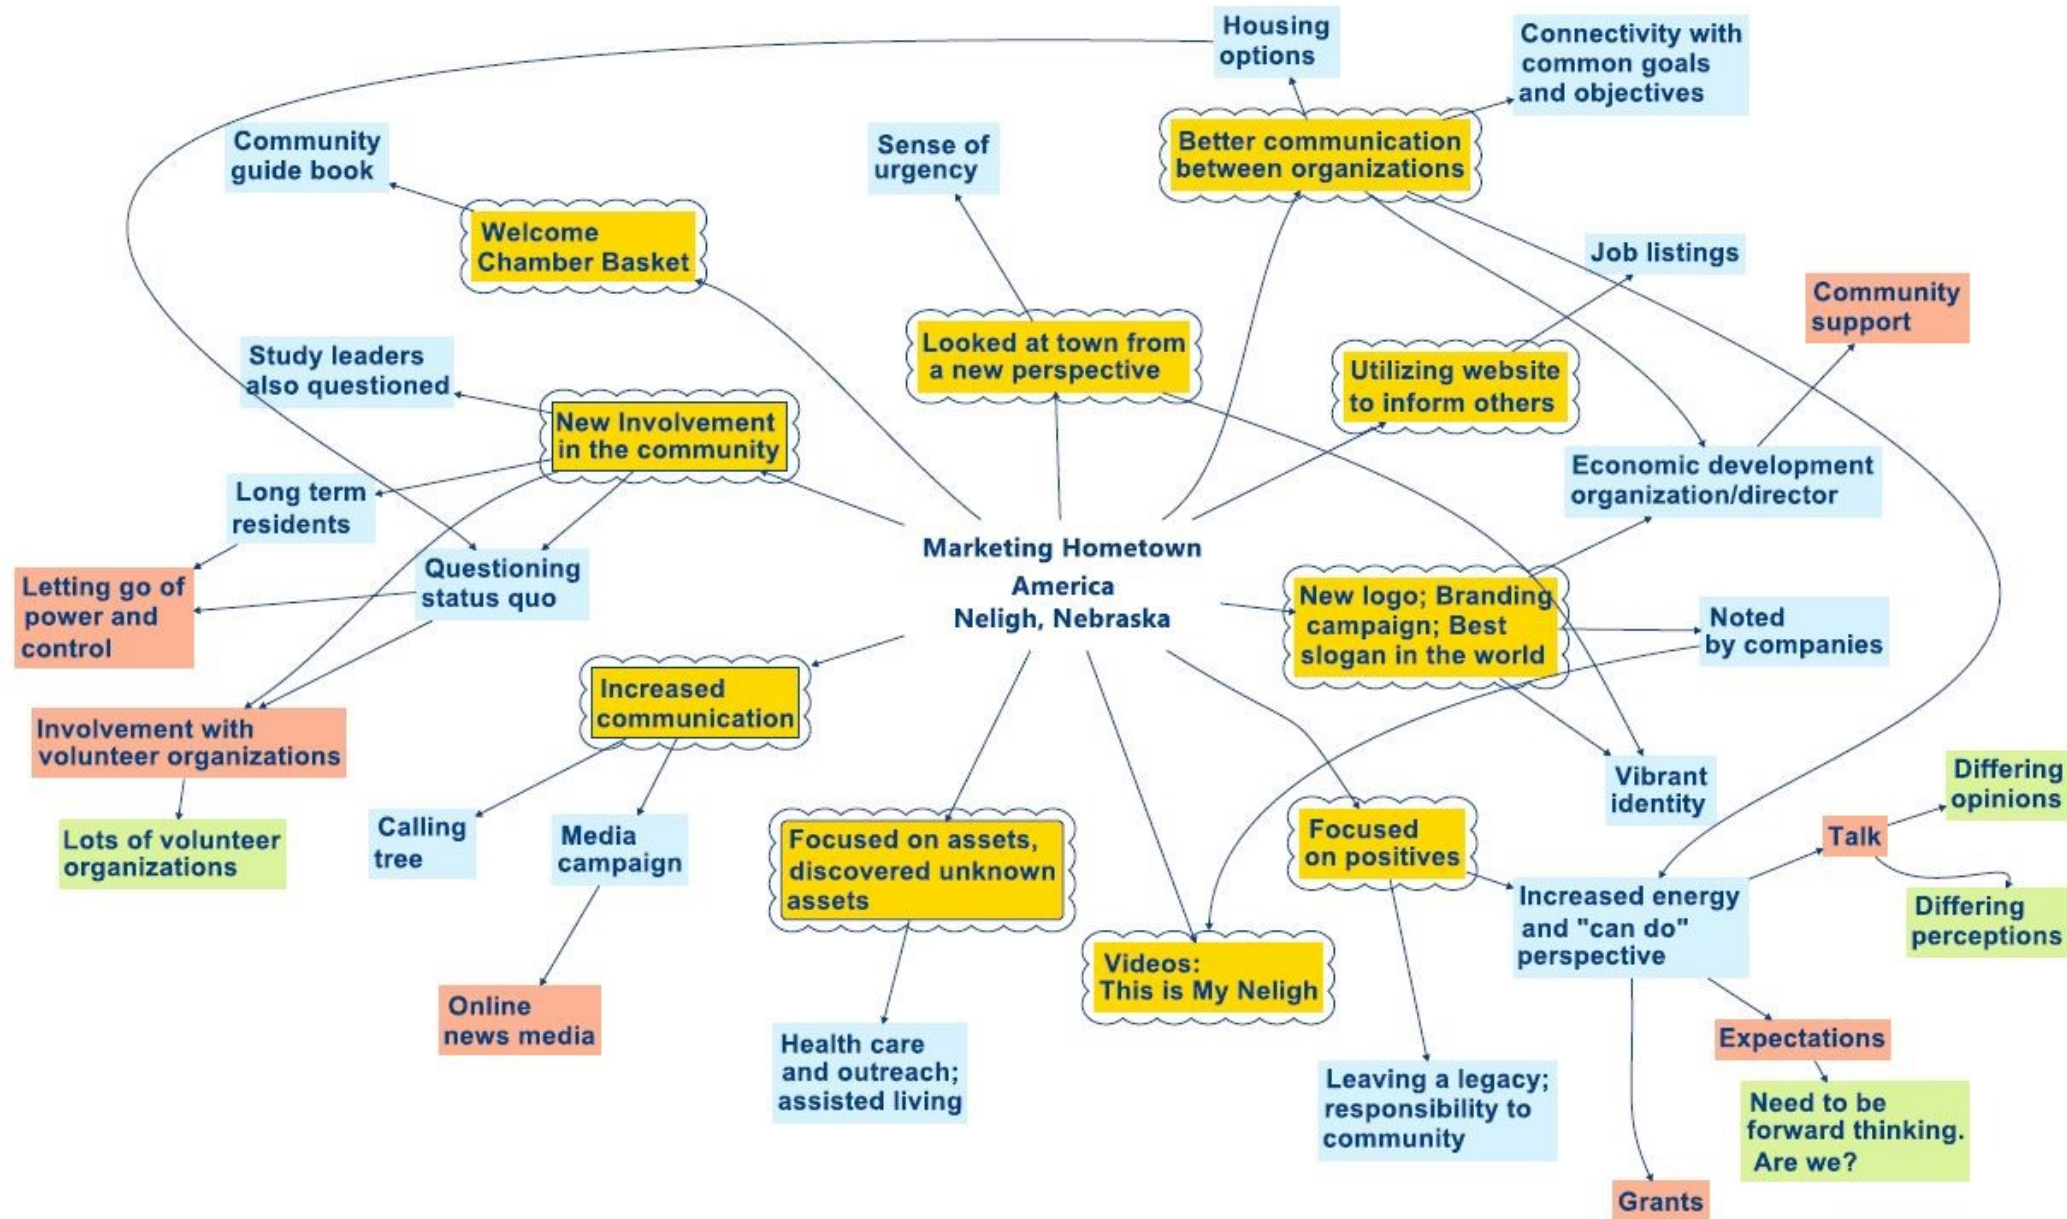

- Focuses on outcomes, not on processes
- Uses the Appreciative Inquiry Method
 - Critique: biased toward positive effects
- Participants might not have complete information

Using REM results

Uses of Ripple Effect Mapping results include:

- Funding requests and grant reporting
- Evaluation planning
- Creating an initiative logic model
- Communicating with stakeholders

Ripple Effects Mapping: An Overview

- 1. Design the Workshop**
- 2. Hold the Workshop**
- 3. Follow-up Conversations**
- 4. Cleaning, Organizing, and Reporting**

Step 1: Design the Workshop

Who to Invite?

- 12 – 20 Participants
- Aim for a mix of perspectives!

Step 1: Design the Workshop

Define the Workshop's broader question:

What has happened as a result of your work in the coalition?

Step 1: Design the Workshop

Design interview questions that feed into the workshop's broader question:

What is different, better, or improved since your coalition started working together?

How is your community different because of your coalition work?

What parts of the coalition's work are you most proud of or excited about?

Step 2: Hold the Ripple Effects Mapping Workshop

- 1. Welcome and Introductions**
- 2. Partner Interviews**
- 3. Share out and Mapping with the Larger Groups**
- 4. Reflection and Closing**

Welcome and Introductions

- Review the Purpose of Today's Meeting
 - Introduce the workshop's broader question
 - Introduce Ripple Effects Mapping
- Review the day's agenda
- Group introductions

Partner Interviews

- Match participants into pairs
 - Consider mixing stakeholder groups
 - Be aware of potential power-dynamics
- Have partners interview each other
 - 5-7 minutes per partner
 - Interviewer takes notes
 - Switch and repeat

Partner Interviews

Review interview notes for effects and transfer to half-sheets of paper

- **Changes** resulting from the initiative
- **Impacts** the initiative has had on individuals or the community
- **Results** or **achievements** of the initiative

Share-Out and Mapping

1. Have everyone hand in their “favorite” effect; distribute half-sheets evenly around the wall
2. Cluster the effects into themes
3. Name and discuss

Part 3

Share-Out and Mapping

Share-Out and Mapping

1. Share your “favorite” effect; distribute them evenly around the wall

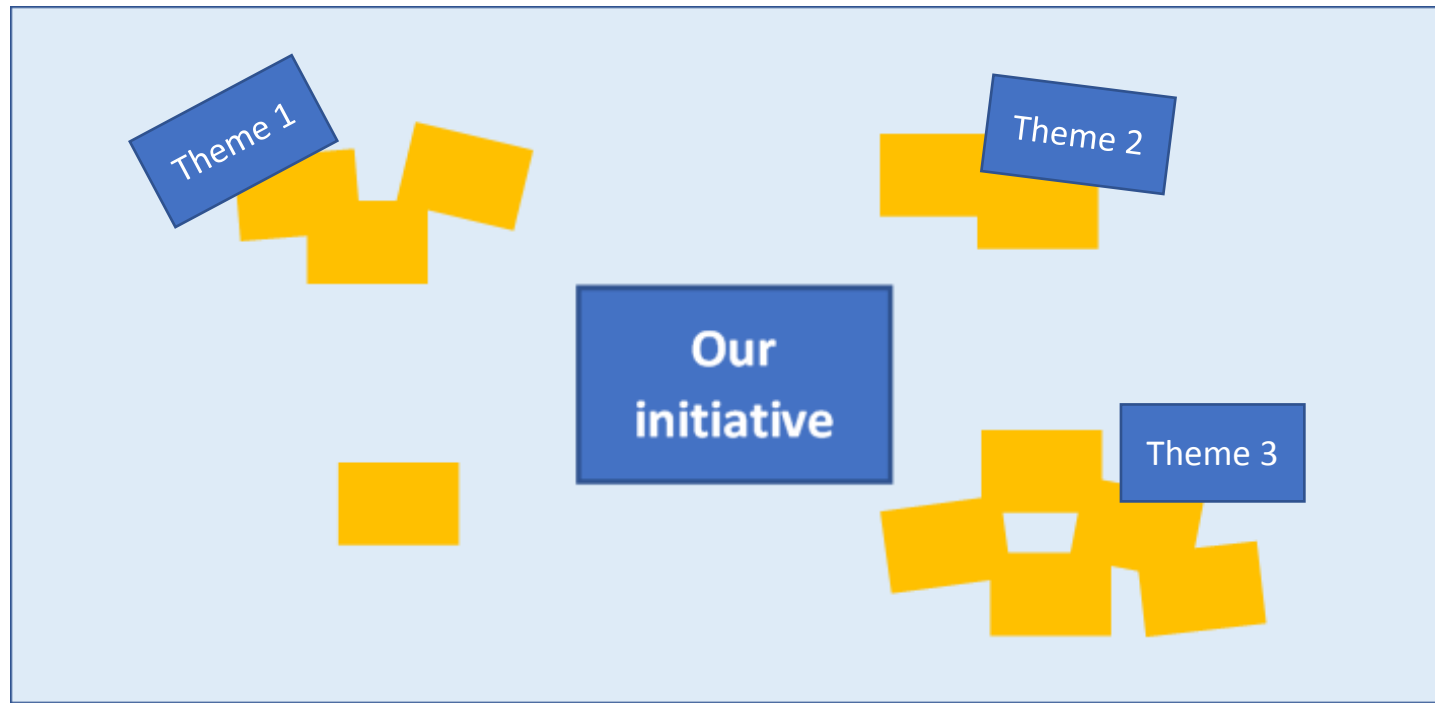

Share-Out and Mapping

2. Cluster the effects into themes

Share-Out and Mapping

3. Name and Discuss

Reflection and Closing

- Group reflection on the map and process
 - Discuss any negative effects
 - What information or voices are missing?
 - Significant learnings, patterns, themes
 - Remember: take a picture of the map!

Step 4: Follow-up Conversations

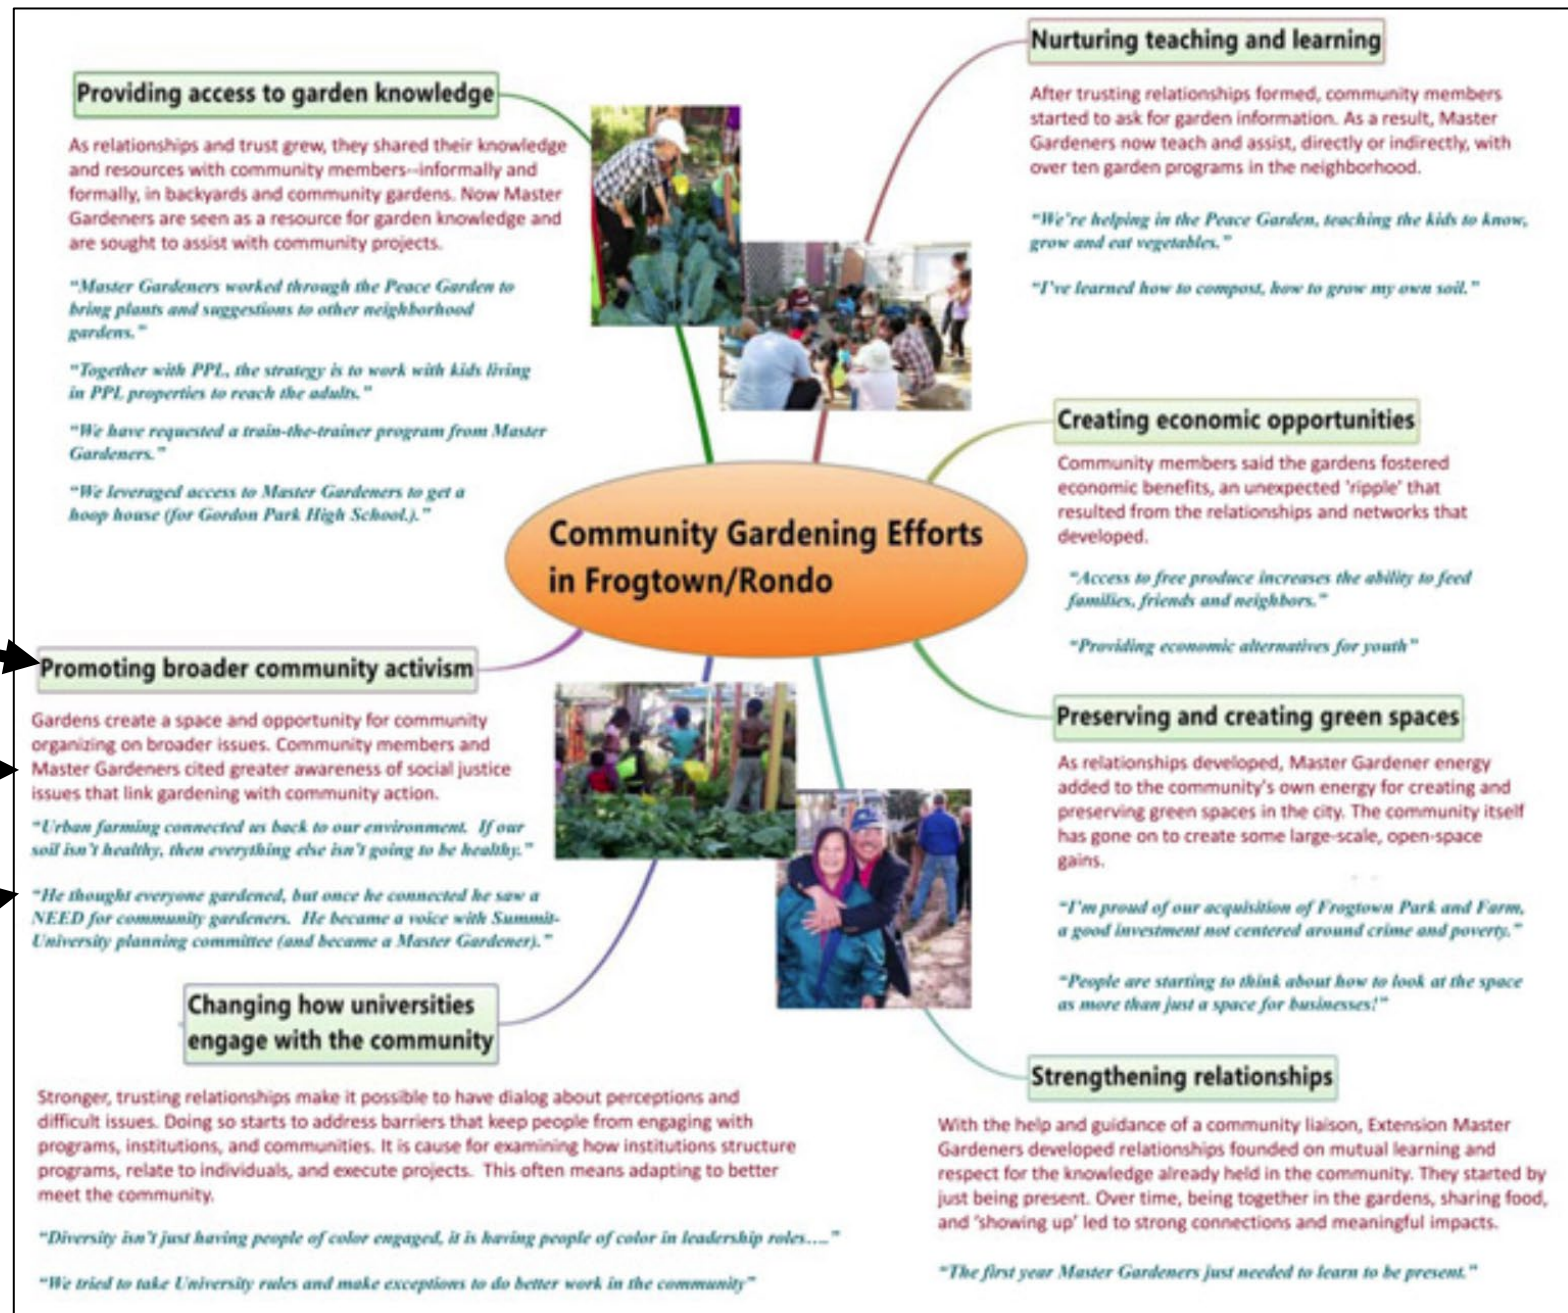

- Identify additional information needed through workshop reflection
- Invite stakeholders to interviews

Data cleaning, Organizing, and Reporting

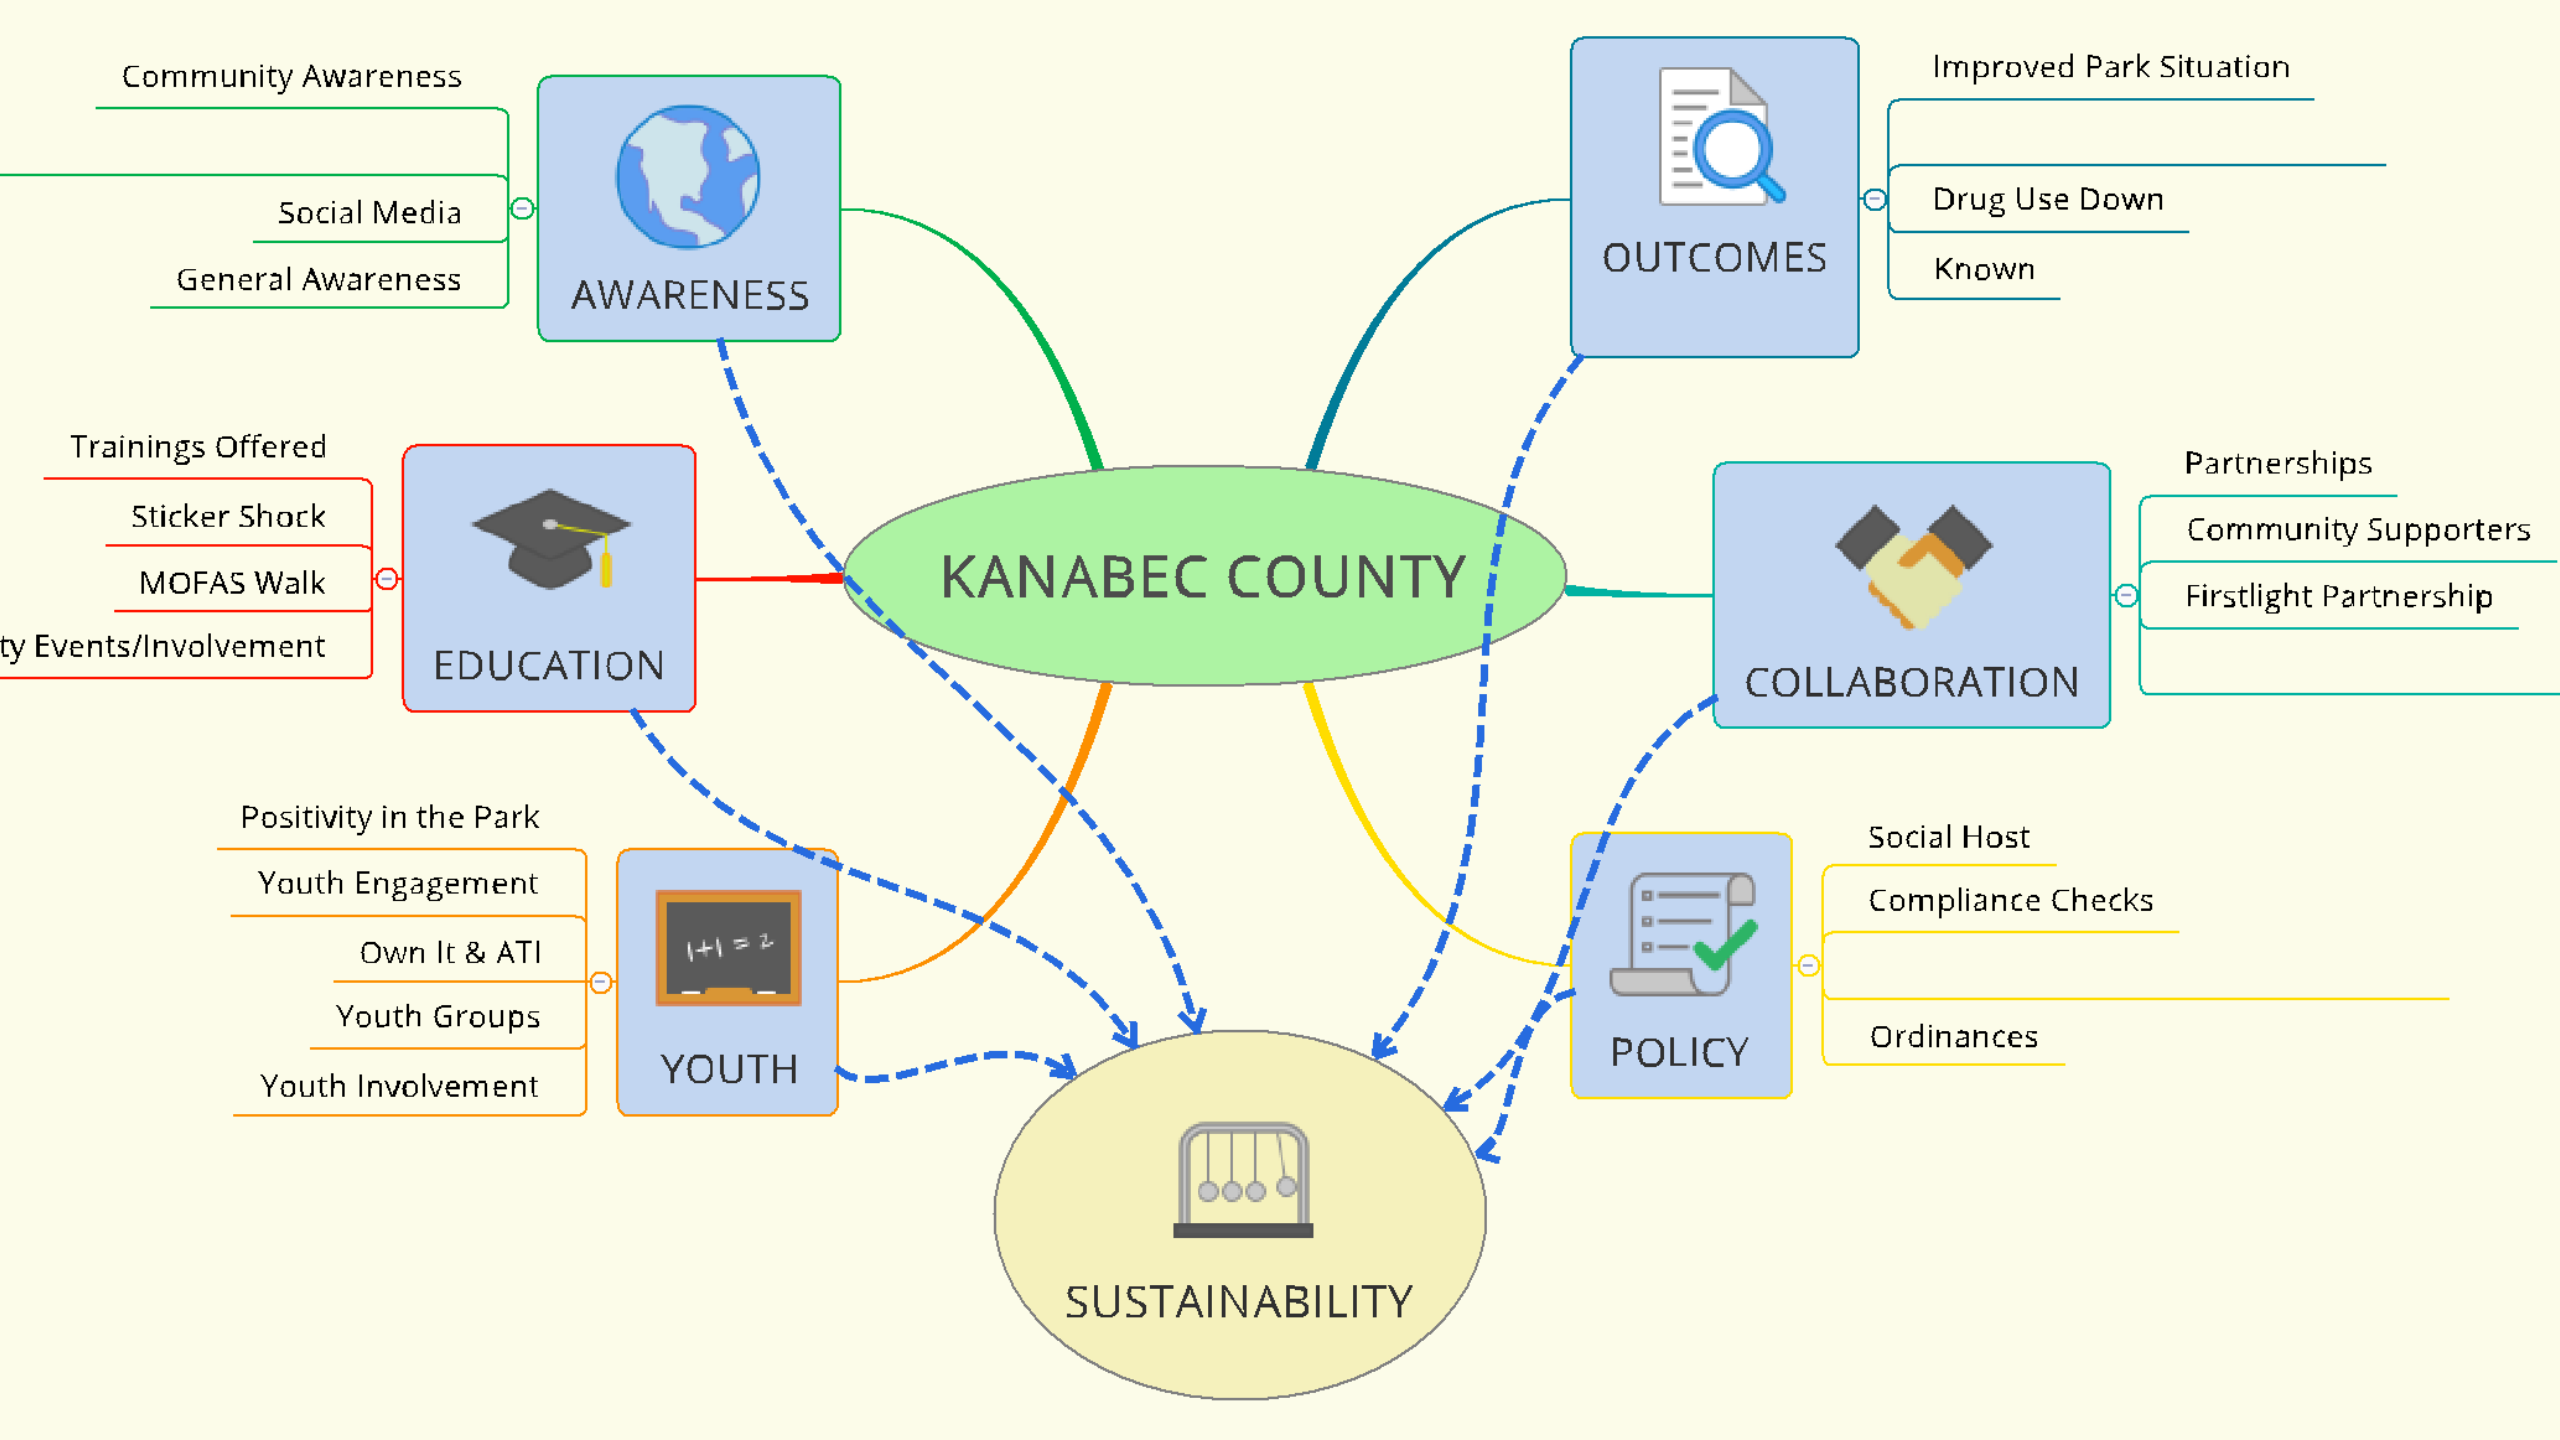

High-level Themes

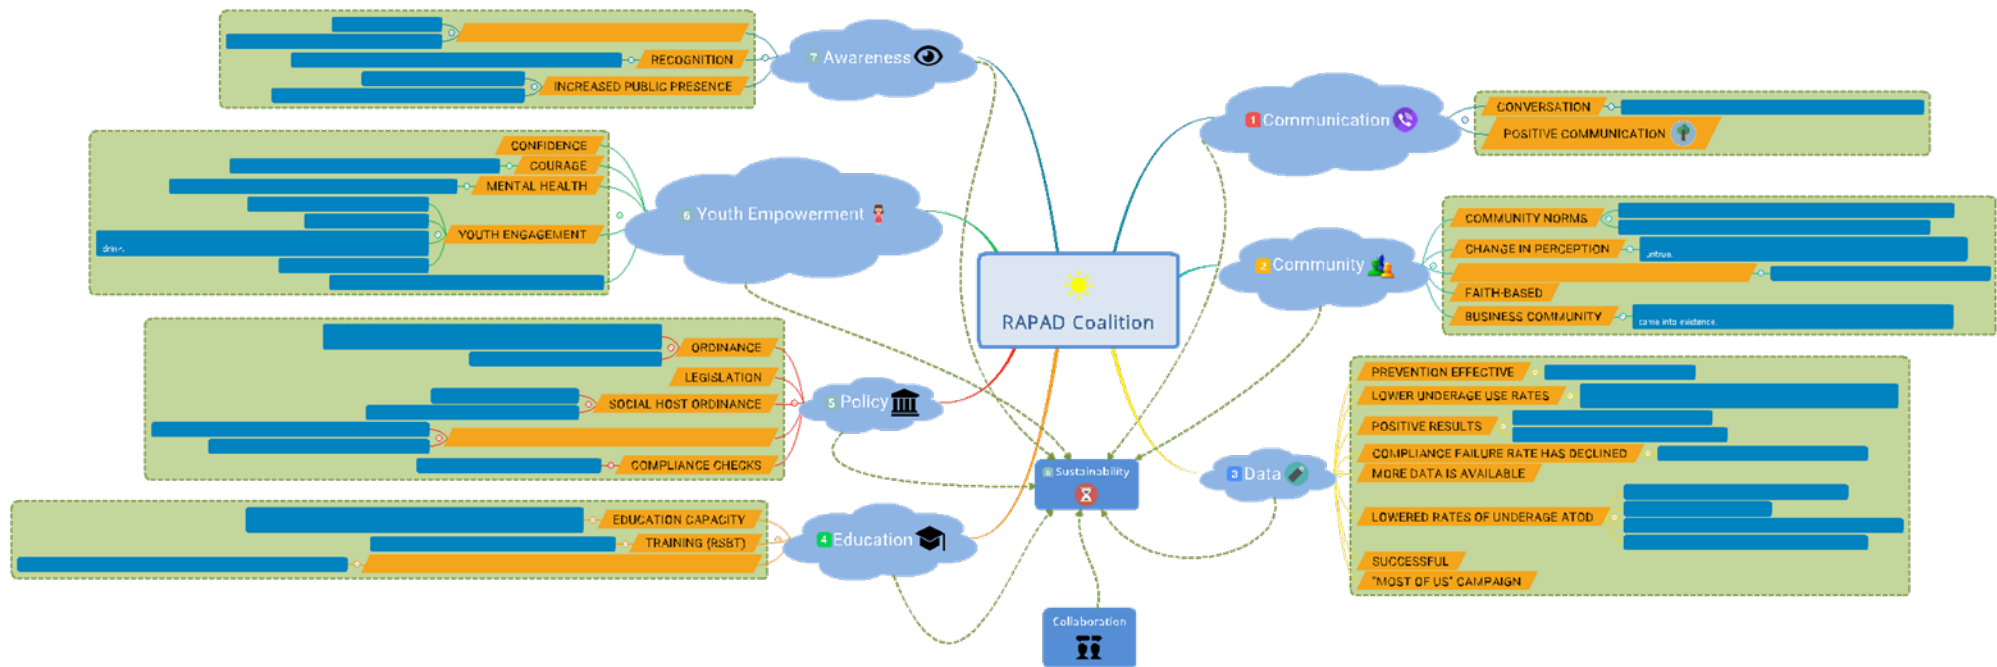

Descriptions of themes

Supporting quotes and evidence

Appreciative Inquiry Interviews

- **Our Appreciative Inquiry Interview Questions:**

- ❖ What is better or improved since your coalition?

- ❖ How is your community different because of your coalition?

- ❖ What parts of the coalition's work are you most proud of or excited about? Why?

Why did we choose to do Ripple Effect Mapping?

- Sharing your story!
- Sharing program effects with Stakeholders.
- Motivation for coalition/group
- Done as a group, so the coalitions gets to explain their story.
- Takes very little time and allows the coalition to create a document to share
- Allows for new coalition members to hear what has taken place prior.
- Helps to see/hear the history of the coalition to better help plan the future! Move to Strategic Planning!

Demonstration

- Community XYZ
- 4 branches (Youth, Ordinances, Education, Data)
- 12 Twigs: Choose where they belong

THANK YOU FOR
ATTENDING!
